Address

Telangana, Hyderabad

Education

B.Tech: 2023-2027

Anurag University

Major in Information Technology
with 93% Aggregate.

Acheivements

- **LeetCode:** Solved 500+ problems across data structures and algorithms.
- **Hack Attack 2024:** Achieved 3rd place in a 24-hour national inter-college hackathon.
- **AINCAT 2025:** Secured All India Rank 868 among 4+ lakh participants.

Certification

- Mastering Data Structures and Algorithms using C++ (GFG).
- Artificial Intelligence Primer Certification (Infosys).
- Full Stack Development (Udemy).

Deekshitha Gorugantala

Objective

B.Tech IT student with strong interest in Artificial Intelligence, Machine Learning, and Full Stack Development. Skilled in building web applications and solving complex problems. Seeking an opportunity to apply technical knowledge to develop innovative and scalable software solutions.

Skills

- **Programming Languages:** C/C++, Java, Python.
- **Databases:** MySQL, MongoDB.
- **Core Fundamentals:** Data Structures and Algorithms, Object Oriented Programming, Operating System, Computer Networks, Debugging & Troubleshooting.
- **AI/ML & Data Science:** GenAI, Machine Learning, Deep Learning, Natural Language Processing (NLP), Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch.
- **Tools and Technologies:** VS Code, Git, GitHub, React.js, Bootstrap, Node.js, REST APIs, Linux/Unix environment.
- **Soft Skills:** Time management, Teamwork.

Experience

SOFTWARE ENGINEERING INTERN – Uber STAR

FEB 2025- APR 2025

- Selected through Uber She++ 2025, a diversity-based tech program.
- Improved backend service performance by 20%, optimizing internal tools used by 100+ employees.
- Reduced debugging time by 30% through collaboration in agile sprints and enhancing core platform functionality.

AI DEVELOPER INTERN - INFOSYS

JUN 2025- AUG 2025

- Automated handling of ~500+ banking queries/day via an AI-powered chatbot, reducing manual workload by 40%.
- Increased query response accuracy to 92% using NLP for balance, transactions, and fund transfer requests.
- Enabled real-time authentication and secure communication, supporting 1000+ concurrent users.

Projects

Diabetic Retinopathy Detection | Machine Learning & Deep Learning:

- Built an automated diagnostic system to detect diabetic retinopathy from retinal fundus images to support early blindness prevention.
- Applied SVM and KNN classifiers for feature-based prediction and compared performance with CNN-based deep learning models.
- Integrated Grad-CAM to visualize model attention and improve explainability.
- Selected as one of the Top 20 projects for the Google AI/ML Mentorship Bootcamp.

Smart Placement Tracker | Full Stack - MERN:

- Developed a web-based portal for college Training & Placement Offices (TPO) to manage campus recruitment drives efficiently.
- Implemented company listings and automated student eligibility filtering based on CGPA and branch.
- Designed interview round tracking system to manage multiple recruitment stages.
- Integrated email notification system to inform students about application status and interview updates.
- Developed responsive user interfaces and RESTful APIs for seamless interaction between frontend and backend.
